JOURNAL CLUB ACTIVITY

JOURNAL CLUB ACTIVITY FOR PG STUDENTS

Introduction:

A journal club is an educational meeting in which a group of individuals discuss published articles, to keep themselves abreast of new knowledge, promoting in them the awareness of current research findings, teaching them to critique and appraise research, and encourage them to utilize research in evidence based practice of the speciality. A journal club one is simply expected to summarize the research question, the methods, the results and the conclusions and not slavishly read through the article. It is the presenter's interpretation that is more important than actually rehashing the contents of the article.

Scope/Objective:

1. Discussion and review of current literature.
2. Development of skills for evaluating medical literature.
3. Improving reading habits.
4. Improving small group participation, presentation, and communications skills.
5. Teaching and assessing critical appraisal skills for reading and writing a scientific paper.
6. Providing an interactive and social opportunity for peer to peer learning.

Activities Include:

1. PPT presentation.
2. Research paper preparation competition.
3. Discussion forum.

Date: 12/08/2022

**To,
Principal,
Pharate patil Ayurvedic medical college**

Subject: Requisition for availing library facilities

This is a progressive self-funded pharmacy college managed by shri Wagheshwar gram vikas pratishthan mandavgan pharata pune and a well-known education trust in the western Maharashtra. The college has been conducting post graduate course: M. Pharm Pharmaceutics, Pharmacology, Pharmaceutical chemistry since 2021. For the dissertation projects of student of M. pharm III semester, there is a need of referencing of ayurvedic texts and journals at your library facilities.

It will be of great help if you could provide the service. Your services will be duly acknowledged in the report of the dissertation.

With regards and thanks.

Yours,

(57) Abstract :

The present invention relates to a solid lipid nanoparticles composition comprising Kaempferol and other pharmaceutical acceptable excipients for antioxidant activity. 5 Using a probe sonicator, Sodium Alginate, Glycerol Monooleate (GMO), and poloxamer 188 are used to make nanoparticles. It has an encapsulation rate of 85.12%, an average particle size of 150.9±0.69 nm, and a zeta potential of +18.2 mV. The cumulative in-vitro drug release up to 12 hours is 90.42%, indicating that sodium alginate nanoparticles provide sustained release pattern at different pH levels. As a result, the formulation and development of GMO loaded Kaempferol nanoparticles are described in this work.

No. of Teaching Staff	05

Name & Designation of Person conducting visit: Mr. Kiran Kale,

Industrial visit was carried out at JP Laboratories private limited , Unit (I)A-76, (II)A-82/83,MIDC, Chemical zone , Kurkumbh ,MIDC , Pune , Maharashtra . 4th April 2023 especially for first year students. The main objective behind the visit was to make student aware about how various activities related to Production, Quality control, Quality Assurance and Regulatory Affairs carried out in company and give them feel of Officer as soon as they finish there course. I along with **112** students left for visit at 9.30 a.m. and took about four hour to cover the distance. The company is located in Kurkumbh MIDC. As soon as we reached company we were guided by Mr. Kiran Kale to canteen for breakfast where an orientation of company was given by heads of production department about history and how company was established. It was great to know that company follows Japanese principal of equality among all the level of employees in company because of which they have same dress code and same canteen right from higher level managerial team to lower level workers. We found even canteen employees in same dress. Company follows principle of "People before Product" which was clearly visible from safety measures taken by company and other policies.

The conception of this philosophy is derived from the core objective of the company – „To Contribute to the Society“. After introduction all students were divided in four groups of 30 students and were headed by one manager of company who helped them to understand how production is carried out in company. Maximum production in company is carried out by means of machinery subdivide in various activities like inception of raw material, mixing process, making jackets, tablet compression machine , covering the product and then converting it into finished goods.

Industrial Visit

With Head of Department

Finally Finished Products are packed and are sealed where production batch no is embossed for its future verification required. Company defective ratio is less than 1 percent which shows the how effective company works. We took almost two hour to see complete set of production which was followed by questions of students. I appreciate staff member who guided students with each and every question with detailed answers. It is rightly said that “See & know” is better than „read & learn“. Students have got real feel of company’s working after this visit. They got a chance to transfer their theoretical knowledge to practical implicative.
